## **DETAILED ACTION**

### ***Response to Amendment***

This communication is responsive to Amendment C, filed 11/12/2004.

Claims 1-33 are pending in this application. Claims 1, 11, 21, 31, 32, and 33 are independent claims. In the Amendment C, None of the claims were amended. This action is made Non Final.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 31, 32, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Your First Cup of Java (For Unix).

In regards to claim 31, Your First Cup of Java teaches a method in a computer system, said method comprising the steps of: graphically presenting native Java applications within said computer system utilizing a graphical user interface (i.e. Page 7, Hello World Program and Page 9, Hello World Applet); and graphically presenting

Art Unit: 2174

native UNIX applications within said computer system utilizing said graphical user interface (i.e. Page 3, Terminal Window, and Page 3, "Pico editor"), wherein Java applications and UNIX applications are presented by said computer system utilizing the same graphical user interface (i.e. The terminal, Pico, and Hello World applications are all running on Solaris environment which is a Unix-based platform).

Claims 32 and 33 are in the same context as claim 31; therefore they are rejected under similar rationale.

### ***Allowable Subject Matter***

Claims 1 –30 are allowed.

Claims 1-30 are deemed allowable over prior art because the prior art does not teach a method in a computer system wherein the window manager is a communication channel between the native UNIX applications and the Java desktop.

### ***Response to Arguments***

Applicant's arguments with respect to claims 31-33 have been considered but are moot in view of the new ground(s) of rejection.
